

# Paleosol-loess sequence in Valle de Tafi, Argentina

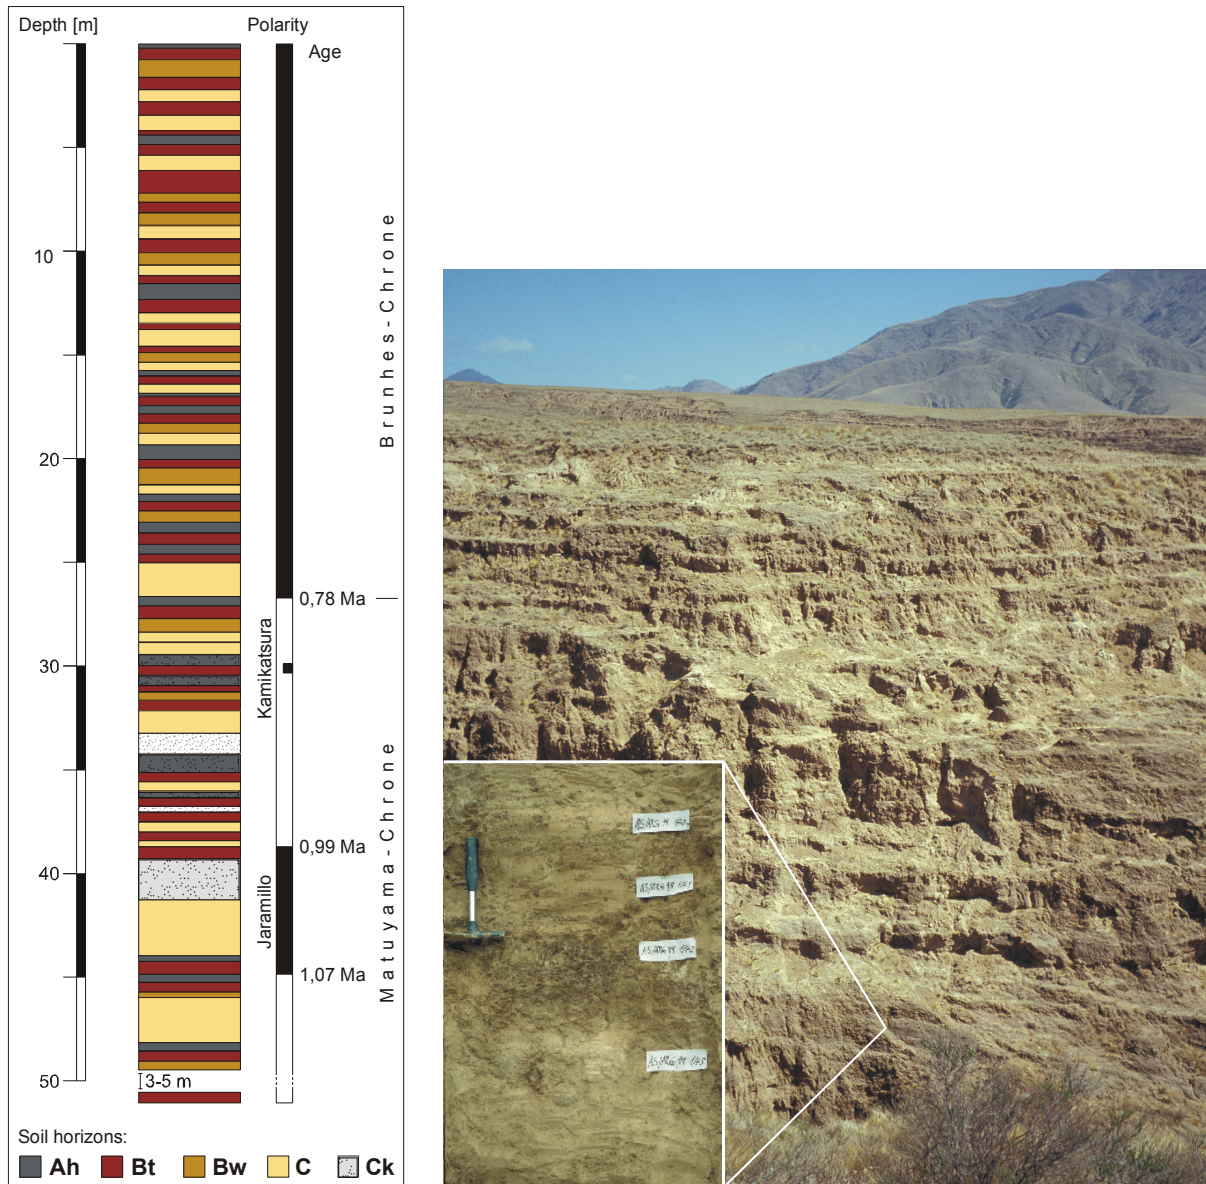

Fig 2: Abundant paleosol-loess sequences in the Andes of NW-Argentina (Valle de Tafi, 3000 m a.s.l.) with more than 31 paleosols. The zoom gives an example of a single paleosol. The profile reaches more than 1.2 million years back in time. Schellenberger et al 2003.
